

LAUNDRY

DON'T

- ✗ Do more than 1 laundry load per day.
- ✗ Use chlorine bleach.
- ✗ Take a shower or bath at the same time as doing laundry.
- ✗ Use Liquid Fabric Softener

DO

- ✓ Use washing soda or oxygen (non-chlorinated) bleach instead.
- ✓ Use biodegradable, phosphate free detergents.
- ✓ Use peroxide stain removers.
- ✓ Wait for laundry load to finish before draining a bath or taking a shower.

- Be aware of how much water is going into the septic system as it cannot handle large volumes of water at one time.
- Your system can only handle the volume of water and waste from the number of people it was designed for!
$$\# \text{ of Bedrooms} \times 2 \text{ People} = \text{Capacity}$$
- Using washing soda or oxygen bleach in your laundry will not only whiten and brighten your clothes, but also help to keep the septic system healthy.
